Factors that could cause actual events or results to differ materially include, but not limited to, general business and economic conditions and the state of the semiconductor industry; market acceptance and competitiveness of the driver and non-driver products developed by the Company; demand for end-use applications products; reliance on a small group of principal customers; the uncertainty of continued success in technological innovations; our ability to develop and protect our intellectual property; pricing pressures including declines in average selling prices; changes in customer order patterns; changes in estimated full-year effective tax rate; shortages in supply of key components; changes in environmental laws and regulations; exchange rate fluctuations; regulatory approvals for further investments in our subsidiaries; our ability to collect accounts receivable and manage inventory and other risks described from time to time in the Company’s SEC filings, including those risks identified in the section entitled “Risk Factors” in its Form 20-F for the year ended December 31, 2014 filed with the SEC, as may be amended.
1990’s
Founder B.S. Wu pioneers flat panel technologies at Chimei Electronics as CTO

2000’s
Chairman Wu establishes Himax to meet DDIC demand for large panels and fast-growing medium and small panels

2010’s
Himax gains market share with design wins with leading technology products companies, worldwide

and beyond...
Himax leads LCOS development and innovation of new display technologies.

CORPORATE TIMELINE

June 2001
Himax Taiwan formed by B.S. Wu

October 2004
Himax forms Himax Display to focus on LCOS microdisplay technology

March 2006
Himax IPOs on Nasdaq. Raises $147M with Morgan Stanley

2009
GFC reduces sales ~$900 million to ~$700 million. Refocuses effort on non-driver products

June 2013
Himax completes take out financing of Chimei

Sept 2015
AR business hits inflection point. Mass Production follows in 1Q16

December 2003
Himax Taiwan begins trading on Emerging Stock Board (TW) under "3222"

August 2005
Himax Taiwan delists from Emerging Stock Board

February 2007
Himax acquired Wiseopal, and forms Himax Semiconductor to focus on small and medium sized DDICs

2010-2012
Non-driver sales increase gross margins and BOM sales opportunities

July 2013
Signs investment agreement with Google
Leading Display Driver Provider
- Worldwide leading display driver player with a wide range of drivers for panels of all sizes and in-house intellectual property
- Image technology solutions provider

Diversifying Revenues and Customers
- Top tier customers globally
- Diversifying revenues from DDIC to CMOS image sensors, LCOS microdisplay, touch panel controllers, timing controllers, power management IC, and ASIC service
- DDIC market share leader

Operational and Public Market Performances
- Long term profitability potential with no fundraising since IPO
- Disciplined cost control
- Stable cash flow
- Committed to high dividend payout ratio
- Debt-free: Short-term debt offset by deposits of restricted cash reported under current assets

Innovative New Products Capturing Growth Markets
- Automotive applications and AR/VR related businesses
- Core driver IC business benefit from technology integration and market leader position
- Growth from non-driver products, such as LCOS microdisplay solutions and WLO, touch panel controllers and integrated touch and display ICs, CMOS image sensors, and timing controllers

Dividends

• Distributed a total of $378 million of dividend since IPO (2015 payout in July)
• Dividends referenced primarily on prior year’s profitability

Share Buy Back

• Initiated four share buyback programs totaling $158 million since 2007
• Repurchased a total of 46.5 million ADSs through Dec 31, 2015 at average purchase price per ADS: $3.15

$524 Million

Returned to shareholders including dividends and buy-backs since IPO

Product Lines & Growth Opportunities
2015 Q3 Driver Market Share

- Samsung 30%
- Himax 10%
- Silicon Works 7%
- Ilitek 5%
- Sitronix 3%
- MagnaChip 3%
- Raydium 2%
- Others 7%

Source: IHS iSupply and company estimates (This covers all TFT-LCD and OLED DDICs)

- One of the leading players in display driver ICs
- Key differentiation from IC peers - total solution offering of image processing related technologies and leverage of existing strength in mobile devices

HIMX Driver IC Market Share by Application

- Large panel DDIC market share expanding across panel makers, especially in China, as a result of their capacity expansion and in-sourcing strategy
- Smartphone market share should improve when AMOLED DDIC shipment starts to top-tier Korean customer in 1Q16
- Solidly positioned as a market share leader in tablet and auto application

Source: Trendforce, IHS iSupply and Company Estimates
Market Trends
Continuous new TFT-LCD capacity expansion in remains aggressive with a special focus on advanced display technologies
The newly built Gen 8.5 capacity is all located in China, and by 2019, leading Chinese panel maker’s market share will likely be world No. 3
4K TV will continue to motivate purchase interest and contribute to much higher 4K TV penetration rate going forward

HIMX Strategies and Market Position
• Major beneficiary from growing China panel market as a market share leader as they continue to source more panels locally for local and export demands
• Himax’s stands strong as OEMs actively seeking total solution providers for better performance, simpler supply chain, and more reliable engineering support
• Penetrating into Korean 4K TV customers

Market Trends

DDIC in smartphone and tablet applications remain the backbone of the company as a global market share leader

Korean and Chinese smartphone customers seeking product differentiation with AMOLED panels

Pure in-cell TDDI market acceptance gaining traction

Automotive IC market to grow at the highest rate among all applications at a 6.7% CAGR from 2014 to 2019

Virtual Reality (VR) headsets using OLED displays is a new market

HIMX Strategies and Market Position

- Capitalize on resolution trend. Work closely with panel makers and end-customers of top-tier smartphone ODMs
- Comprehensive product portfolio: smartphone driver ICs including QHD, FHD, HD720, qHD, and WVGA; tablet driver ICs including higher resolution products up to WQXGA and 4K2K
- Leverage new design win with a new leading customer in China
- Pure in-cell (or TDDI) ready as an industry pioneer
- Anticipate AMOLED DDICs to kick off a new growth cycle for smartphone and VR applications in 2016
- Firmly position company in automotive space with comprehensive customer and product portfolio
**Market Trends**

Head mounted technology is about to change the world. AR product development for business, industrial, search, gaming, social media, military, toy, automotive and other consumer markets.

Limited companies provide the combination of R&D, joint development and manufacturing expertise.

Significant barrier of entry to new market entrants and existing technology companies without scalable manufacturing.

**HIMX Strategies and Market Position**

- LCOS industry’s market leader with proprietary technologies, strong patent protection on LCOS crystal process and module, in-house facilities and shipping record > 2M units.
- Front-Lit™ LCOS technology to enhance product performance and greatly simplify customers’ manufacturing process - successfully engaged multiple top-tier customers.
- Primary product focus is Head-Mounted Display (HMD), Heads-Up Display (HUD) & industrial applications.
- Continue close collaboration with Google and other multinational companies on next generation AR devices.
- LCOS technology recognized as most superior to other competing technologies in AR/VR applications.
- Higher gross margin than company average without much increase of OPEX.
- Continue to gain new project engagements with tier 1 customers in addition to approx. 30 current customers.
- Inflection point in 2015 September with mass production starting in 1Q16.
Market Trends
Integration of Display & Touch by panel makers and OEMs

**HIMX Strategies and Market Position**
- Rapid growth since 4Q11
- Started several key on-cell MPs from 3Q15
- TDDI pure in-cell solution started small volume production in Q4'15 and to generate meaningful volume starting 2H16 as early mover
  ✓ Close partnerships with essentially all of the leading panel manufacturers, module houses, and OEMs
- Launched force touch products in 2015 and have secured design-wins for leading smartphone makers' 2016 models

![Touch panel controllers]

![Touch Controller IC Addressable Market Forecast (Units)]
Market Trends
CIS development accelerating in functionality and new applications
Advanced Wafer-Level Optics (WLO) is the future for computational optics and 3D sensing

**HIMX Strategies and Market Position**
- One of the market share leaders in notebook application
- Low end smartphone market kept trending caused a weak 2015
- CIS high sensitivity, low noise, cost effective, and low power consumption design with solid pixel technologies remains competitive
- Introduced industry leading ultra low power computer vision sensors and Near Infrared (NIR) sensors for 3D and next-gen smartphone, tablets, AR/VR and IoT devices
- WLO application includes light-field camera, array camera, dual color LED in flash, and 3D sensing
  - In-house know-how and manufacturing facilities
  - Inflection point in 2015 for small volume pilot production shipments of HMD wave-guide; mass production in 1Q16
  - Compact Diffractive Optical Element (DOE) integrated laser projector for mobile devices, automotive, AR/VR devices, and IoT applications
Market Trends
TCON becoming the key enabler of next generation ultra-high resolution panel development

HIMX Strategies and Market Position

• The beginning of a multi-year growth with expanded adoption from MNT & NB to 4K TV
• New TFT-LCD capacity plan in China in 2015 and beyond remains aggressive with a special focus on advanced display technologies
• Himax’s eDP 1.4 TCON is the first to debut in the market to support 4K2K resolution
  ✓ Unique total solution that pairs with Nvidia G-Sync and AMD FreeSync™ to eliminate screen tearing, minimize stutter, and address panel system power consumption challenge
• Possible eDP adoption in smartphones, tablets and VR devices
  ✓ eDP outperforms MIPI when display resolution trends beyond FHD to QHD, 2K or even 4K
  ✓ eDP 1.4 delivers huge improvement over previous versions

Himax eDP TCON in TV Gaining Momentum

- YoY decline due to Korean customer product change and the decline in tablet and CMOS image sensors businesses
• Growing large-sized panel drivers in 2015 and beyond
• Global market share leader in small and medium-sized panel driver ICs despite weak market sentiment
• Further diversify products and expand customer portfolio in various segments
• Increasing non-driver sales to diversify sales base and improve gross margin
• LCOS and WLO hit inflection point in 2015 September with small volume pilot shipment and mass production in 1Q16
• Total solution component provider

Largely reduced dependence on one single customer, Innolux.

- Diversifying product revenues by non-driver product wins and leveraging existing customers
- Innolux disposed of its entire equity holding in Himax on June 19th, 2013, ending its status as Himax’s related party
- Growing shipment to new panel manufacturer customers in China, Korea and Taiwan since 2013

**Customer Diversification**

</table>
• Successful transformation in 2012 to increase sales by 16.5%
• 2014 4Q marks highest revenue since 4Q 2008
• 2015 sales declined due to Korean customer product change and the decline in tablet and CMOS image sensor businesses
• Positive on long term growth

• 4Q 11 marks the inflection point for GM expansion as a result of new product launches
• GM retraction in 2015 is from higher mix of sales in China and competitive price points in market for LDDIC
• GM improvement
  ✓ Resolution migration will improve GM of SMDDIC
  ✓ Favorable product mix with higher non-driver sales percentage is positive for corporate GM
  ✓ LCOS and WLO developments and associated NRE will lift corporate GM in 2016 and beyond
Currently streamlining core business R&D efforts and doing expense control through product integration

Despite ongoing expense control in response to macro uncertainties, still expanding in LCOS and WLO with exciting growth opportunities

Will resume profitability growth in 2016

Debt free
Operating and R&D Expenses

- More controlled OPEX
- Continuous R&D commitment
- 2014 and 2015 OPEX include RSU $9.3mn & $4.5mn

EBITDA

- Positive long term profitability outlook

Founders and management team

Dr. Biing-Seng Wu, Chairman of the Board - Dr. Wu, the founder of Himax, previously served as President, CEO and a director of Himax Taiwan. As a pioneer of TFT-LCD panel industry in Taiwan, Dr. Wu has been active in the TFT-LCD panel industry for over 20 years. With 61 patents related to Flat Panel Display granted worldwide, Dr. Wu has made significant contributions to Taiwan panel industry including the completion and operation of Taiwan’s very first TFT-LCD plant, the winner of Outstanding Industry Contribution Award at the Gold Panel Awards 2009 from Ministry of Economic Affairs, etc. Dr. Wu holds a B.S. degree, an M.S. Degree and a Ph.D. Degree in Electrical Engineering from National Cheng Kung University. With well-recognized outstanding research and development capabilities, Dr. Wu received numerous awards including National Invention Award of Taiwan from Taiwan Executive Yuan in 1992, Research Achievement Awards from Industrial Technology Research Institute for consecutive 2 years in 1992 and 1993, ERSO Award from Pan Wen Yuan Foundation in 2008, etc.

Jordan Wu, President, CEO and Director - Mr. Wu previously served as the chairman of the board of Himax Taiwan since April 2003. Prior to joining Himax Taiwan, he served as CEO of TV Plus Technologies, Inc. and CFO and executive director of DVN Holdings Ltd. in Hong Kong. Mr. Wu holds a B.S. degree in Mechanical Engineering from National Taiwan University and an M.B.A. degree from the University of Rochester.

Chih-Chung Tsai, Chief Technology Officer, Senior VP - Prior to joining Himax Taiwan, Mr. Tsai served as vice president of IC Design of Utron Technology from 1998 to 2001, and manager and director of the IC Division of Sunplus Technology from 1994 to 1998. Mr. Tsai holds a B.S. degree and an M.S. degree in Electrical Engineering from National Chiao Tung University.

Jackie Chang, Chief Financial Officer - Before joining Himax, Ms. Chang was the CFO of Castlink Corporation and VP of Finance and Operations for PlayHut, Inc. Prior to that, Ms. Chang was General Manager -Treasury Control for Nissan North America. She held several positions in Nissan North America during 1994 -2006 including finance, treasury planning, operations and accounting. She holds a BBA in Accounting from the National Chung-Hsing University in Taiwan and an MBA in Finance from Memphis State University.
