# OPEX and the Bottom Line

## OPEX and % of Total Sales

(US\$M/ %)

## Profit and EPS

(US\$M/ US\$)

- Despite disciplined expense control, our full-year 2025 operating expenses increased by 1.1% as we continued to make strategic investments in select non-display IC areas with compelling long-term growth potential, some of which are expected to ramp meaningfully beginning in 2027
- The decreased OPEX ratio in 2024 was mainly a result of strict cost controls amidst prevailing macroeconomic headwinds, along with lower employee bonus compensation, as the amortized portion of bonuses in 2023 was higher than that in 2024, and offset by higher employee salary
- 2022 OPEX up 12.8% YoY, primarily a result of the vested portion of the annual bonus compensation awarded to employees in 2022 and previous years, along with increased salaries and R&D expenses
- 2018 & 2019 higher capex to meet the demands of 3D sensing total solution, projector module or optics
- 2019 completion of the new WLO facility, including additional WLO capacity, active alignment equipment and extra office
