SPECIALIZED DISCLOSURE REPORT

HIMAX TECHNOLOGIES, INC.

(Exact name of Registrant as specified in its charter)

State of Incorporation: Cayman Islands

I.R.S. Identification Number:

Commission File Number: 000-51847

NO. 26, ZILIAN ROAD

XINSHI DISTRICT, TAINAN CITY 744092

TAIWAN, REPUBLIC OF CHINA

(Address of principal executive offices)

Job Lin, Telephone: +886-6-5050880

NO. 26, ZILIAN ROAD, XINSHI DISTRICT, TAINAN CITY 744092

TAIWAN, REPUBLIC OF CHINA

(Name and telephone number, including area code, of the person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

X Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2025

Introduction:

Himax Technologies, Inc. ("Himax" or "We") is a fabless semiconductor solution provider dedicated to display imaging processing technologies. Himax designs, develops and markets

semiconductors that are critical components in display technology; and its principal driver IC and module product families are:

- 1) Display driver IC – they are used primarily for any-sized thin film transistor-liquid crystal display (TFT-LCD) panels like TVs, laptops, monitors, mobile phones, tablets, digital cameras, car navigation and many other consumer electronics devices.
- 2) LCOS micro display model – they are PICO projectors, embedded projector in different applications (cell phone and camcorder), communication, toy projector, and head-mounted-display.
- 3) CMOS IC – they are image sensors used in customer electronics such as mobile devices, notebook PC, automotive and surveillance.
- 4) Analog IC – they are used primarily to power IC chips and white Light-Emitting Diode (LED) drivers.
- 5) Display module – For medical application display monitor.

The majority of these principal products sold by Himax contain Conflict Minerals. Based upon Himax’s internal conflict mineral management mechanism covering the Reasonable Country of Origin Investigation with Due Diligence following the OECD Guidelines, the following conclusion has been reached:

Himax’s principal driver IC and module products contain Conflict Minerals that may have originated from the Covered Countries. Himax has conducted a reasonable country of origin inquiry and due diligence in good faith; however, based on information reasonably available to the Company, Himax is unable to determine that such products are DRC conflict free.

Himax maintains a Conflict Minerals Policy that supports Conflict Free Sourcing. The link to this policy is included below:
